

Washington State DOT Cascades - Charger fleet summary

Charger Fleet

- Eight locomotives in the fleet
- Over 1.7M miles on the fleet
- Pull/push multiple equipment types

Key issues at Seattle

- Covid-19 had an impact on Amtrak staffing
- Original Equipment Manufacturer (OEM) material availability is challenging
- Equipment is resilient against minor debris strike events

Product improvement modifications

- Completed 69 performance and safety enhancements fleetwide, known as Siemens Field Modification Instructions and Amtrak MOD Campaigns

Looking ahead

- Amtrak to execute a TSSSA with Siemens to include the 8 WSDOT Chargers leased to Amtrak
- The 8 WSDOT Chargers will need some compatibility modifications before arrival of the new ICT fleet
